

GIS Technician (posted 05/27/09)

Houston Engineering, Inc., has an immediate opening for a GIS Technician in their Fargo, North Dakota office. This is a full-time position offering competitive pay and an excellent benefit package including company paid health, dental, vision, short and long term disability, life insurance, PTO, paid holidays, 401 (k), and profit sharing.

This position is responsible for performing entry to mid-level professional GIS duties while assisting engineers, surveyors, and environmental scientists with their daily activities. The candidate will be involved in all aspects of GIS map generation including data creation and editing, querying, and spatial analysis, map compilation and map production.

Requires strong knowledge of GIS software for map generation and data creation and a strong background working with ESRI ArcGIS 9.x software is required. Experience with DFIRM production, parcel mapping, AutoCAD and Open Source MapServer software is a plus.

Minimum education requirement of a 2 year degree in GIS from an accredited technical college or program. Experience with civil engineering, water resources, or environmental related projects are preferred.
