Western Range & Water, Inc., an environmental consulting and regulatory service provider, is looking for motivated, high quality individuals to fill Seasonal Field Technician positions in its Buffalo and Gillette, Wyoming offices.

Position entails working in the coalbed methane fields of the Powder River Basin performing:

- * Reclamation progress monitoring
- * Vegetation sampling/monitoring
- * Erosion, sedimentation, and BMP inspections for storm water pollution prevention plans
- * Other work associated with Wyoming Pollutant Discharge Elimination System permits

Experience in an agricultural or environmental field is preferred but not required. Plant identification knowledge is a plus. Position has qualified for internship credits in the past, and WRW will work with you to meet internship requirements. Competitive wages.

If interested, please send resumes to curt@rangeandwater.com, fax 307-684-9182, or call Curt at 307-684-9183.
